

GRIFOLS IN SOLIDARITY WITH THE PEOPLE OF UKRAINE

We are appalled by the conflict in Ukraine and stand in solidarity with its people during this growing humanitarian crisis. Our hearts are with them as the situation in their country deteriorates rapidly and with increasingly devastating consequences.

Grifols is closely following the situation and making every effort to provide lifesaving plasma therapies and diagnostic products to patients in the region while complying with current international restrictions. We are also coordinating with international humanitarian and relief agencies to donate medicines and medical assistance on the ground to help those in need.

As a global healthcare company with a deep respect for human dignity and human rights that underpins all our activities, Grifols condemns violence of any kind.
